## Next Phase of Telkom's Uncapped High Speed Wireless Broadband Packages Kicks Off

Telkom today announced that it will be extending its SmartBroadband Uncapped High Speed Wireless packages focusing on select LTE base stations across 520 sites in the Eastern Cape, Free State, Gauteng, Kwa-Zulu-Natal, Limpopo, Mpumalanga, North West and Western Cape.

This is an extension of the original phase and it will be available from 1 December 2015 to 30 June 2016.

Customers will be able to access this offer through Telkom's online channels, at Telkom stores or via Telkom's direct sales force, on a 24 month contract at prices starting at R599. These packages are being rolled out to other areas in South Africa on the back of its success in Gauteng since its launch in June 2015.

"We have seen such an uptake on these offers in Gauteng that we now see the roll out of the third phase officially making this a national offer," said Attila Vitai, managing director of Telkom Mobile and Consumer.

"This is a one-of-a-kind offering in South Africa and it means that we continue to drive better value for our customers in innovative ways."

The uncapped high speed package allows customers to access the web at high speeds with peace of mind that their bill will not increase regardless of their usage. As part of the promotional offer, customers will also receive an antenna and installation by Telkom technicians at no additional cost. Promotional packages will be capped at 150 per base station to ensure a high quality customer experience with the service.

The introductory offer will start at R599 for the first 50 customers (only available online), R699 for the second 50 and R799 for the final 50 available packages at each base station. Telkom's SmartBroadband Uncapped High Speed Wireless service includes uncapped data for all traffic types. Normal fair usage policies will be applied.

As this promotion is only applicable to selected areas around the country it is important to visit the online sale portal on the Telkom website <http://www.telkom.co.za/today/unlimited-broadband/> to check the coverage map. On the coverage map, physical addresses can be entered to determine whether or not a customer is eligible to participate in the sale and claim one of the 150 spots available per base station.

Customers who participate in the online sale or purchase the packages at Telkom stores or via Telkom's direct sales force after the 150 spots have already been taken, will be added to a waiting list. Existing Telkom customers in the select areas will have the opportunity to transition to the new packages depending on availability at each base station.

Customers outside of the initial select areas can still take advantage of Telkom's other high speed broadband packages and have the opportunity to transition to the offer should it become available in their location at a later stage.

The online sale portal and the list of eligible LTE locations can be found at: <http://www.telkommobile.co.za/smartbroadband-uncapped-wireless>

### **ABOUT TELKOM:**

Telkom is a leading communications services provider in South Africa. We had consolidated operating revenue of R16.8 billion and normalised profit after tax of R1, 683 million for the period ended 30 September 2015. Total assets amounted to R41.9 billion and equity attributable to the owners of Telkom to R23.5 billion as of 30 September 2015. The group generated normalised free cash flow of R1.4 billion for the period ended 30 September 2015.

As of 30 September 2015, we had approximately 3.3 million telephone access lines in service and 1,030,441 ports connected via MSAN access. We offer business, residential and payphone customers a wide range of services and products, including:

- fixed-line retail voice services using PSTN (Public Switched Telephone Network) lines, including ISDN (Integrated Services Digital Network) lines, and the sale of subscription based value-added voice services and calling plans;
- fixed-line customer premises equipment rental and sales services both voice and data needs and these include PABX, Computers, Routers, Modems, Telephone handsets and other ancillary equipment;
- interconnection services, including terminating and transiting traffic from South African mobile operators, as well as from international operators and transiting traffic from mobile to international destinations;
- fixed-line data services, including domestic and international data transmission services, such as point-to-point leased lines, ADSL (Asymmetrical Digital Subscriber Line) services, packet-based services, managed data networking services and internet access and related information technology services;
- Data Centre Operations includes e-commerce, application service provider, hosting, data storage, e-mail and security services;
- W-CDMA (Wideband Code Division Multiple Access), a 3G next generation network, including fixed voice services, data services and nomadic voice services;
- mobile communication services, including voice services, data services and handset sales through our mobile navbar-brand called Telkom Mobile;

- information and communication services including cloud services, infrastructure services, workspace services, global service integration management and hardware and network equipment sales locally, in seven African countries, the UK and Dubai through Business Connexion Group; and
- other services including directory services, through Trudon (Pty) Ltd, wireless data services, through Swiftnet (Pty) Ltd.

Convergence is one of our key strategic initiatives in building a sustainable future for Telkom. We will lead the provision of converged services in South Africa in support of our mission statement: Seamlessly connecting people to a better life.
