Telkom

Take control of your roaming costs.

Pocket WiFi is your personal, secure, local and international connection to the internet.

For my Business

Introducing Pocket WiFi

You take your mobile devices wherever you go, and now you can stay in complete control of your mobile data costs, even when travelling abroad.

Pocket WiFi is a portable, pocket-sized mobile hotspot that you take with you for global internet access. Use it to create a mobile hotspot that can connect up to 10 devices – smartphones, tablets and laptops – to the internet via 3G while you're on the go, in over 140 countries.

International Data is packaged in 50MB Daily Data Bundles and is billed on a pay-as-you-use model. The cost of the data bundle is dependent on the zone in which the data is consumed. Countries fall in one of four zones.

Pocket WiFi benefits

Affordable and convenient mobile data when travelling.
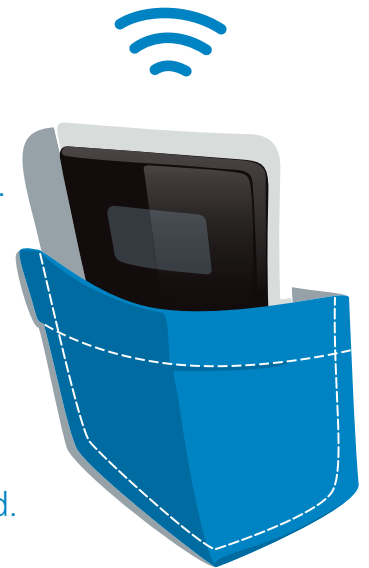

Available in more than 140 countries.

Safe and secure with no public WiFi security concerns.

Switch on and use with no installation or setup required.

When in South Africa, use your Pocket WiFi to access Telkom's award winning and super affordable mobile data network.

Pocket WiFi features

Supports up to 10 WiFi-enabled mobile devices.

Includes the data SIM cards needed for seamless connectivity.

Comes with a free-to-download app so you can track data usage.
