Dial  
SpeedCall  
code

Press \*

Dial telephone number  
(including area code  
where applicable)

Press #

Listen for  
acknowledgement  
/dialling tone

Replace handset

### Note:

- If you intend storing 10 or fewer telephone numbers, the SpeedCall code must consist of one digit (0-9) only.
- If you intend storing 11 or more telephone numbers, it is essential that the SpeedCall codes consist of two digits (00-09 for the first 10 numbers stored and 20-29 for the next 10 numbers).
- A maximum of 30 numbers can be stored. (A block of 10 telephone numbers is regarded as one service.) Use 30-39 for the last 10 numbers.
- Numbers starting with 10XXX cannot be stored.
